1.6 billion people

Poor World's Disease

“If each of the billion people in the rich world devoted the equivalent of one \$3 coffee a year to the cause, several million children every year would be spared death and debility...”

The Scientific American, Jan 2007

RABIES

**100% mortality,
100% preventable**

**99% of cases
due to dog
bites**

**>150 countries
affected**

**~260 annual
cases in PH
since 2014**

STOP RABIES

What is the state of rabies in Davao City?

Human lives and families affected by rabies

Poor knowledge,
attitude and
practices towards
rabies

45%
(below 18)

75%

>60,000 animal bites

Rampant cases
of animal bites,
lack of rabies
awareness

85%
more chance of
rabies in the area

2.5x

**Stray dogs as
the main vectors
of rabies**

3 mo.

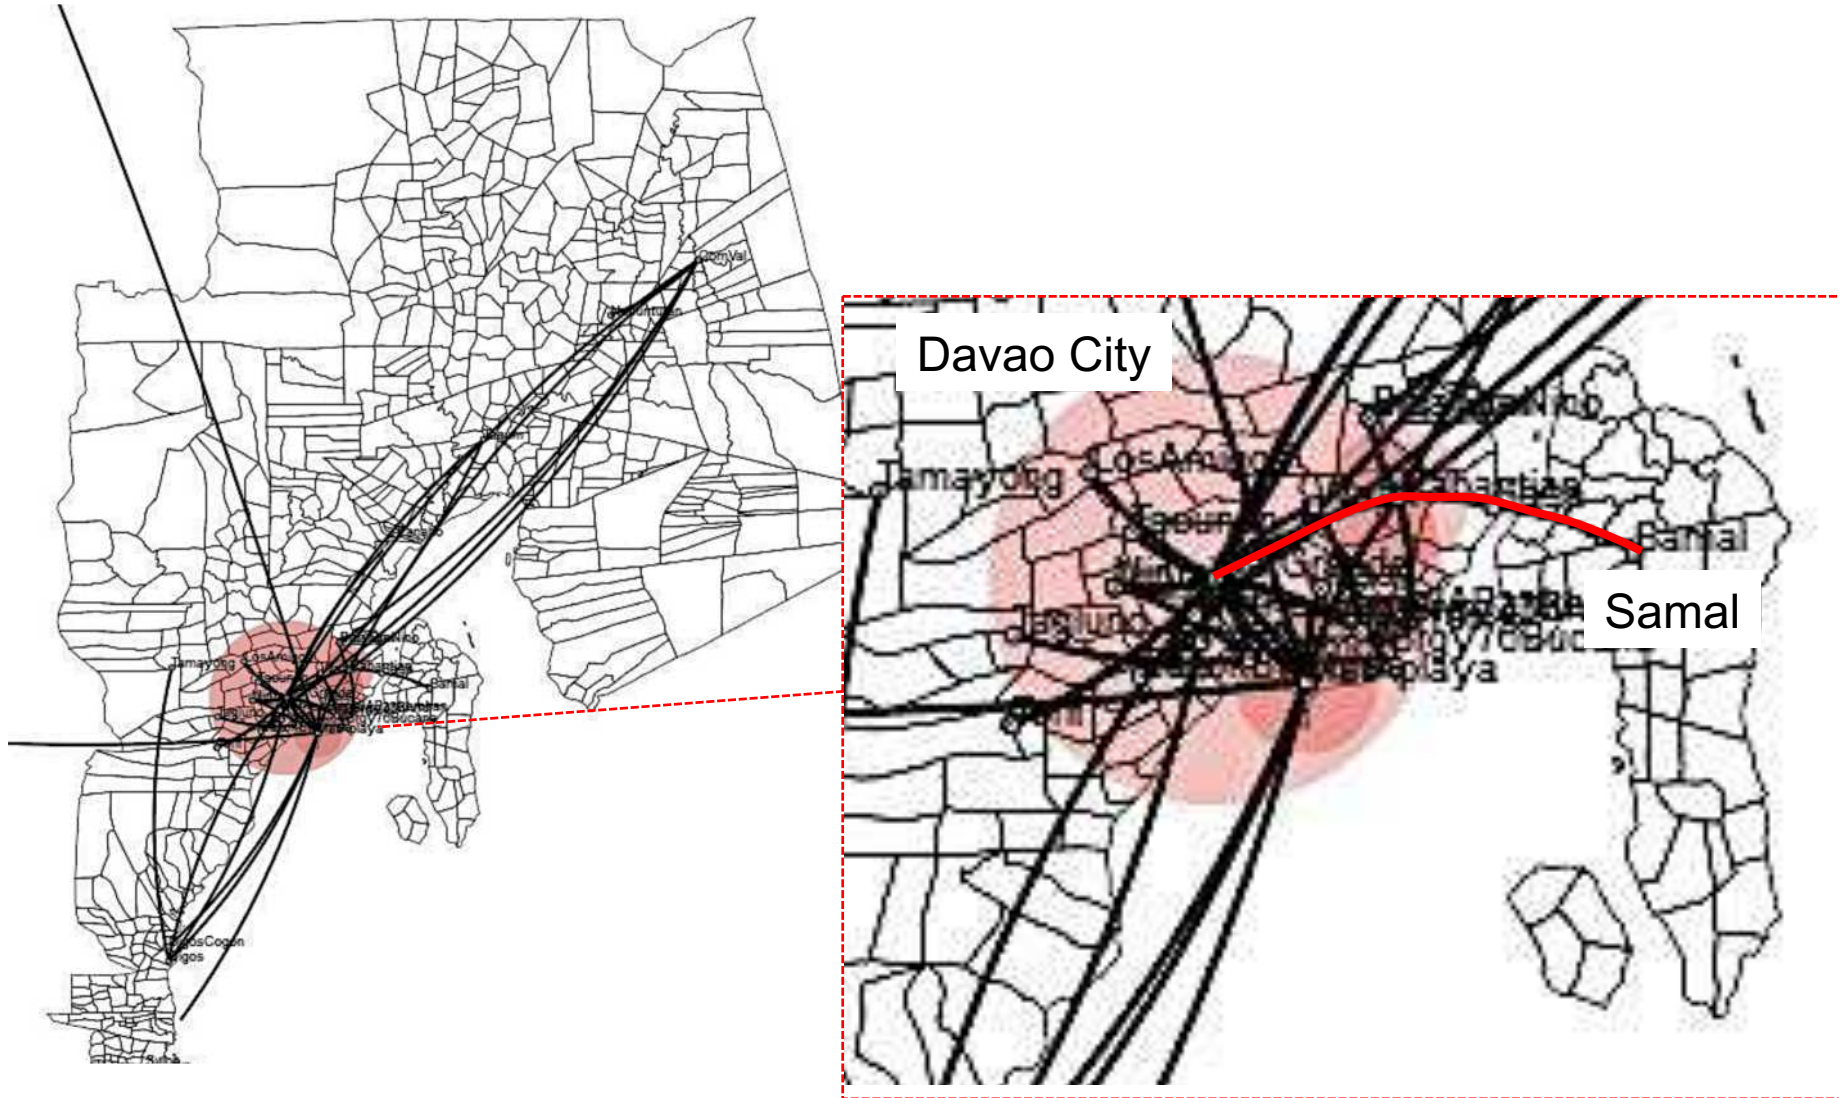

vaccine

@ 10 mo.

**Puppies are left
vulnerable to rabies**

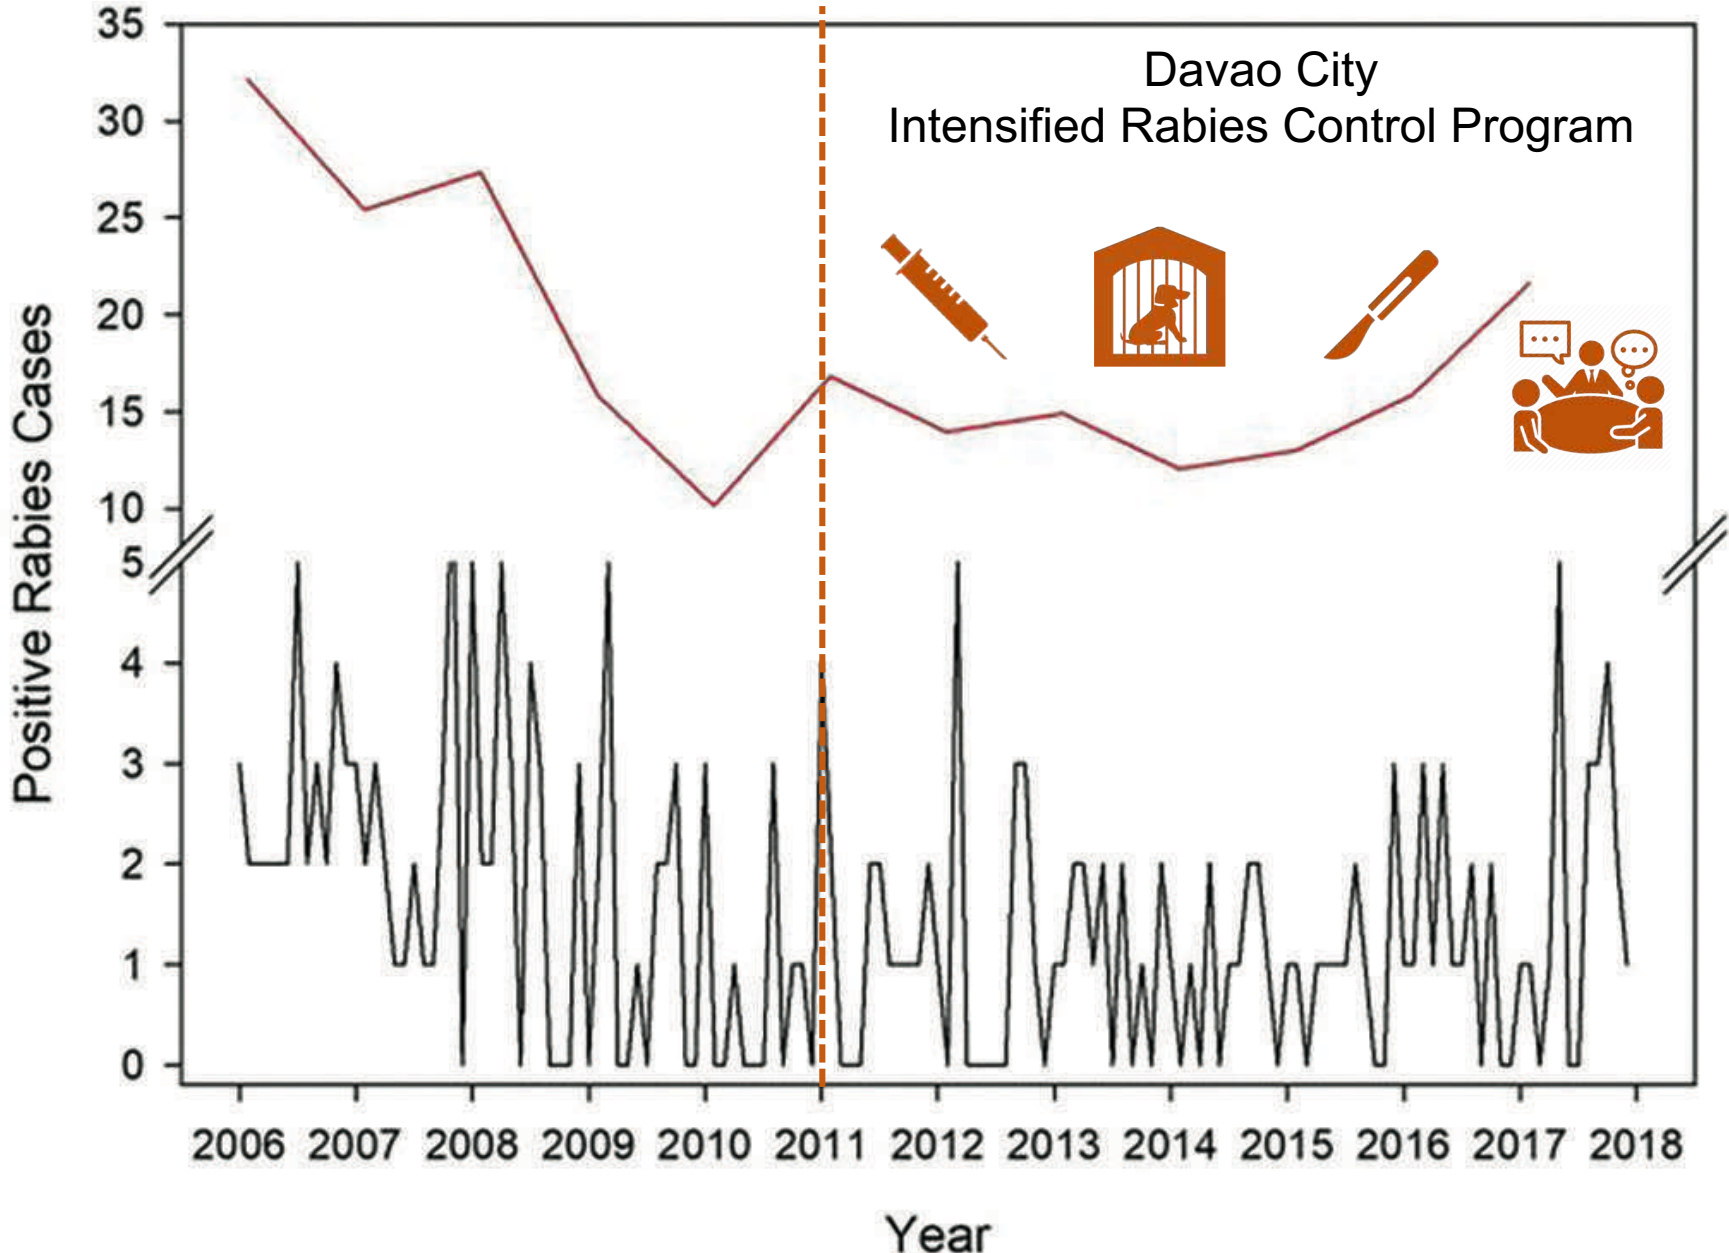

Virus spreads beyond barangay and even the City

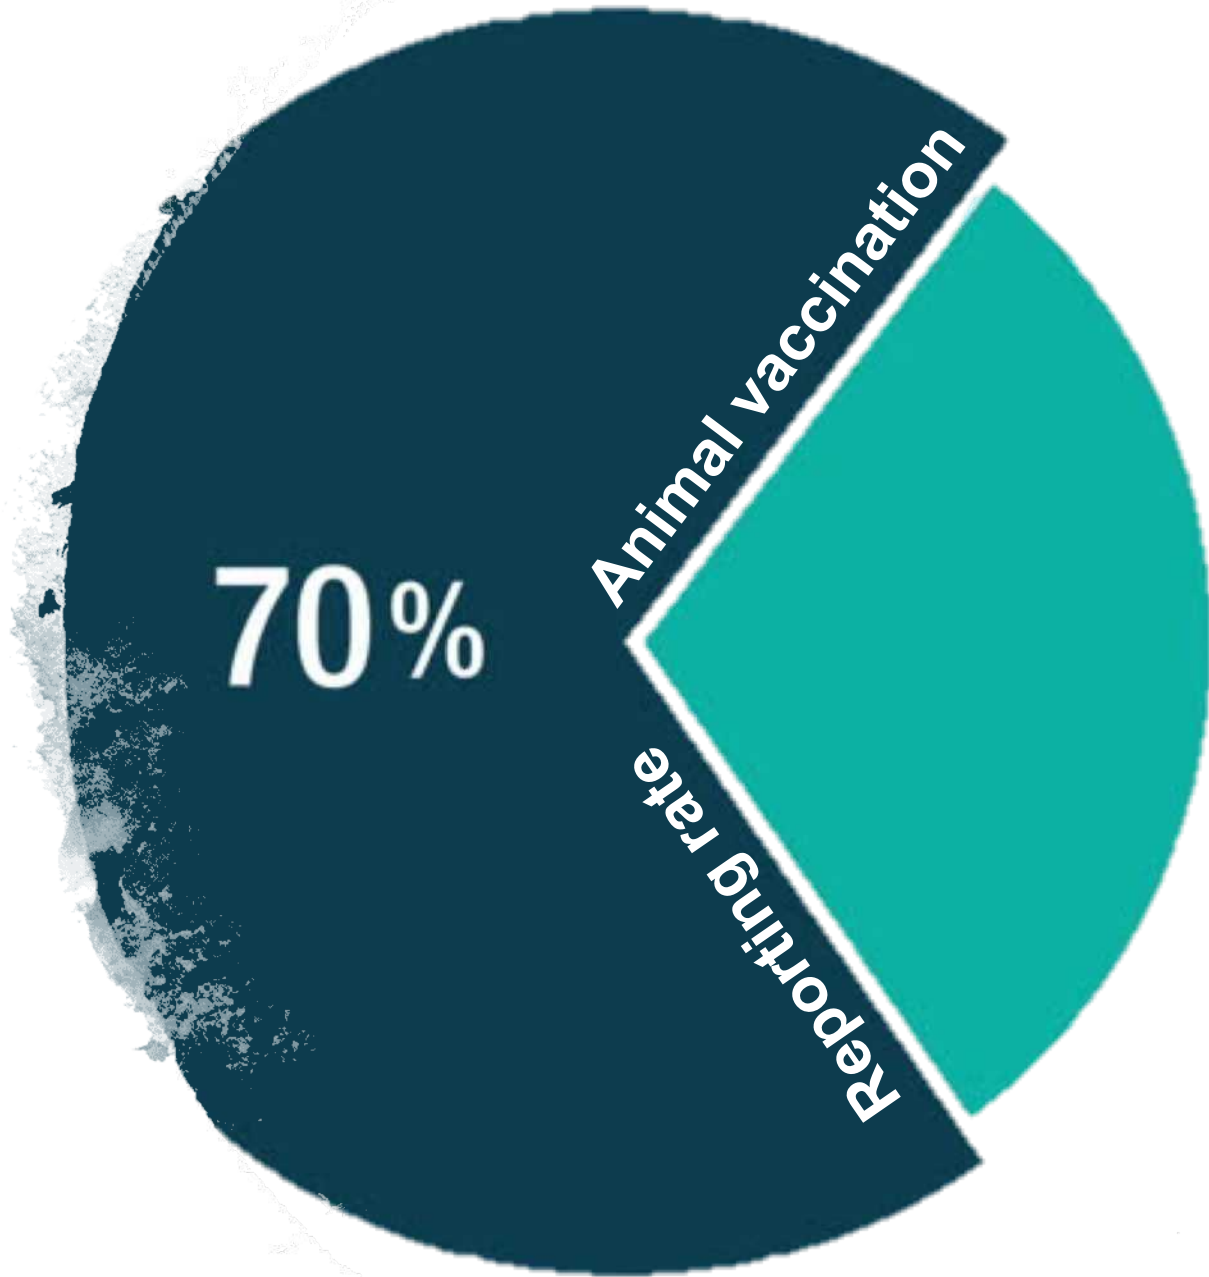

Vaccination • Dog Population Control • Responsible Pet Ownership

**How have LGU
interventions
fared?**

— Yearly Reported Cases

Vaccination and public response is there, but not yet there

low castration turnout

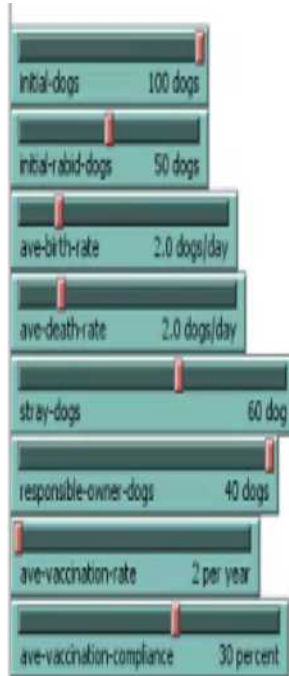

**1250 impounded dogs
prevents 1 rabies case**

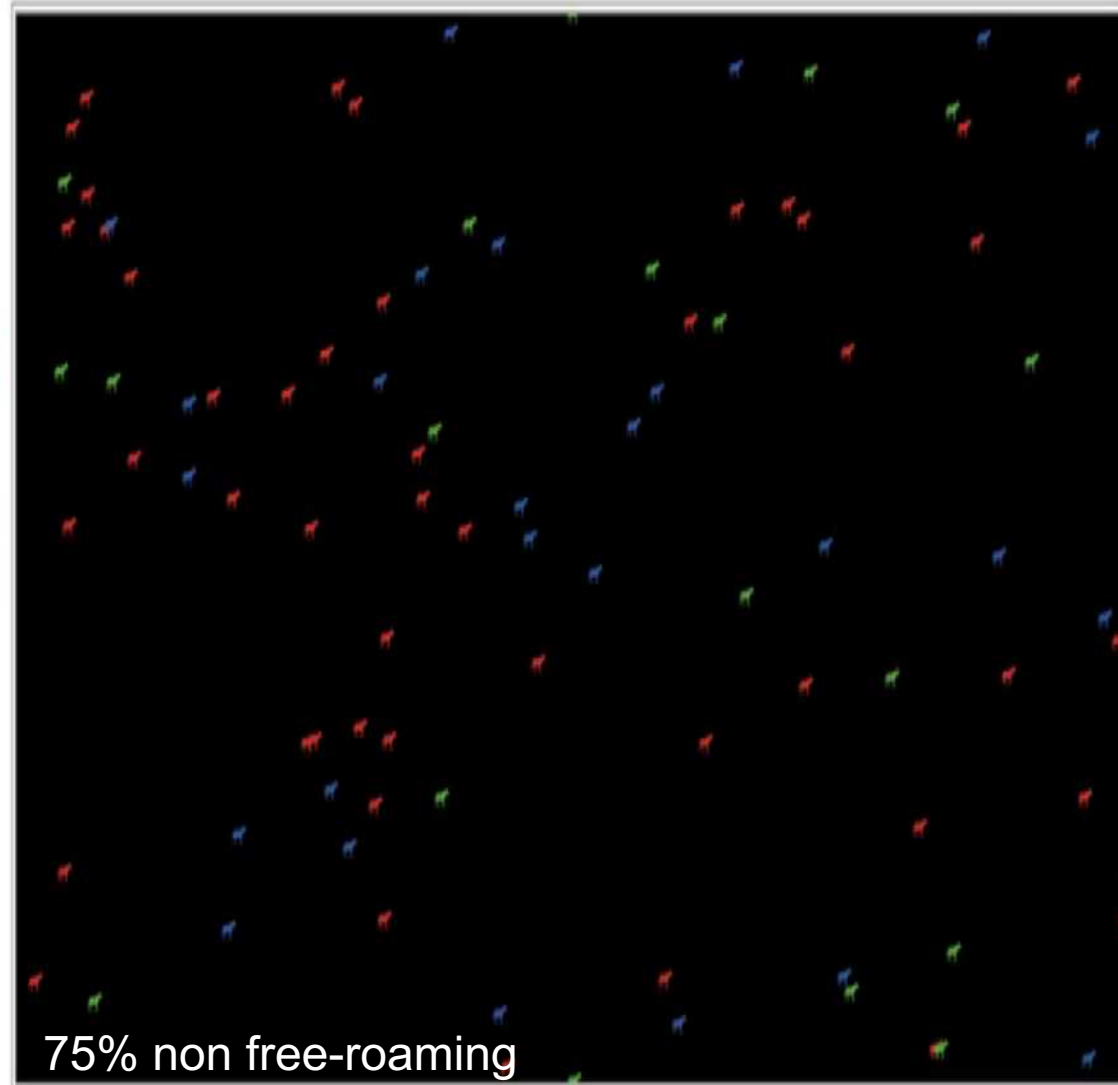

**Dog population control
is a challenge**

Public action on rabies is key!

Set up

75% non free-roaming
